Masonite® Steel

Providing distinction to any home with superb design

Masonite® Steel complements the architectural style of any home

- Impressive variety of panel designs
- Sturdy, metal-edge or wood-edge construction
- Wide array of decorative glass options
- Durable steel facings
- Energy-efficient polyurethane core
- 20 and 90-minute fire doors available
- Masonite® HD Steel High-Definition panel designs available

Masonite® Steel Entry Systems

Introducing the Masonite Entry Door System... Below are recommended components for all assembled door units. Although specific frame components are shown, equivalent products may be used in the assembly of any Masonite door unit. Masonite recommends a high-dam sill, compression weather-stripping, corner seals, and a continuous head & sill system to optimize performance.

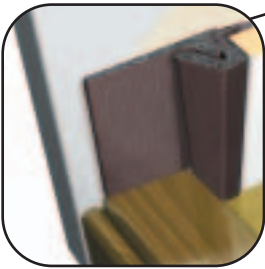

Continuous Head, Sill and Mull System

Utilizing a continuous head, sill and one-piece mull assembly maximizes the stability and rigidity of any sidelited unit. This continuous system also simplifies assembly and virtually eliminates racking and bending.

NOTE: Mill finish is standard on all sills. Brass (pictured below) or bronze finishes are also available.

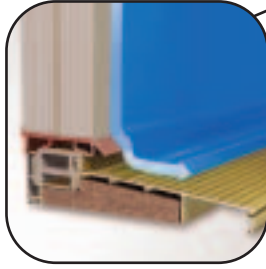

▲ Door: MHD-404-315, Sidelites: MHDSL-450-315

High-Performance Weather-stripping

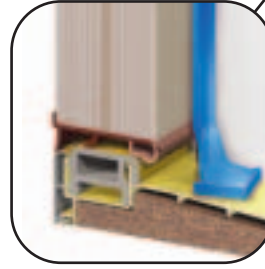

Vinyl-wrapped, foam-filled, compression weather-stripping and corner seals are added to the door frame providing protection against air and water infiltration.

High-Dam Adjustable Sill

High-dam sills create a positive barrier to water infiltration. The high-dam design feature holds back the inevitable rise in the water level against the threshold as wind speed increases. Combining high-dam technology with a high quality door bottom seal, securely protects the bottom of the door unit from air and water infiltration.

The adjustable cap feature allows for easy field alterations. High quality metallic and composite materials are featured for rot-resistance and protection against harsh weather conditions. Fixed bumper and low-profile designs are also available to meet outswing or handicap accessible applications.

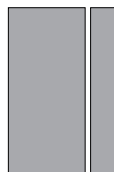

Exterior Frame System

Primed wood frames and applied brickmould are standard. For additional frame options, such as other frame depths, stainable frames, vinyl-clad frames, and PVC brickmould, please see your Masonite Dealer.

Masonite's Full Line of Steel Entry Doors

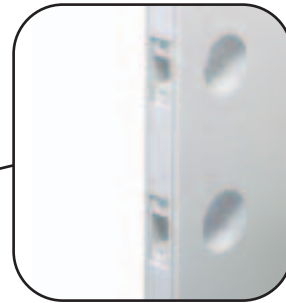

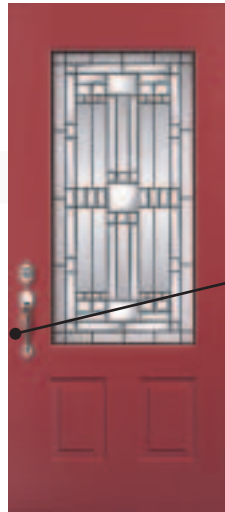

Masonite® HD Steel

High-definition panel profile provides excellent shadow lines, creating outstanding panel definition. Masonite® HD Steel is available as Wood-Edge or Metal-Edge.

Masonite® Metal-Edge Steel

Hinge and lock stiles feature formed metal profiles, maximizing rigidity, security and fire protection.

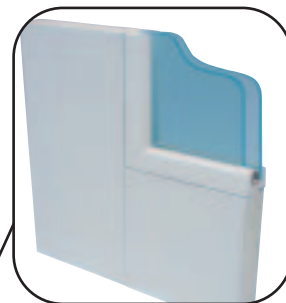

Masonite® Wood-Edge Steel

Hinge and lock stiles feature finger-jointed wood stiles, providing excellent stability and easy field machining.

PREMVU™ Wood-Edge Steel Flush-Glazed Door Panels

The Wood-Edge Steel line is also available as a full-view, flush-glazed product. The integral frame design keeps the lite frame flush with the surface of the door and eliminates unsightly screw holes.

Masonite® HD Steel

Upgrade your steel doors with Masonite® HD High-Definition Steel Doors. The rich, decorative panel profile adds a touch of style and distinction and more closely replicates the appearance of a high-end wood door. Differentiate your home with Masonite® HD High-Definition Steel.

Premium Steel Facings

Prime-coated, galvanized, 24-gauge, steel facings provide excellent corrosion protection.

Specialty™ Glass Inserts

All decorative glass inserts feature a triple-pane 1" insulated assembly providing maximum design selection and performance. Double-pane insulated glass inserts and flush-glazed frame designs are also available.

Polyurethane Core

Rigid polyurethane foam, meeting strict environmental guidelines, provides maximum thermal protection and dimensional stability.

Hardware Reinforcement

Reinforcement is added to the lock area providing a rigid mounting surface.

Metal-Edge or Wood-Edge Construction

Masonite® HD Steel Doors are available with Wood-Edge or Metal-Edge construction.

High-Definition Panel Profile

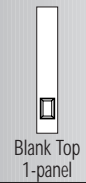

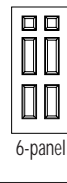

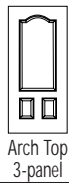

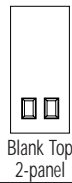

High-definition panel profile provides excellent shadow lines, creating outstanding panel definition.
