ROOF WINDOWS
AND SKYLIGHTS

ELECTRONICALLY TINTABLE GLASS FOR LIGHT CONTROL AND ENERGY SAVINGS

The revolutionary new technology called electrochromic glass in VELUX electronically tintable skylights allows control of the amount of light and heat that enters a room.

The benefits of solar control through electrochromic glass include:

- Light control at the touch of a button without losing a view to the sky... even in the darkened state.
- Energy savings and elimination of uncomfortable heat gain, even on the brightest and hottest days.
- Maximum protection from fading of furniture or artwork.
